

PFA SERIES ALUMINIUM CORES - JIC PORTS - 11 BAR PART NO. 69/04209W

High performance, small size and light weight oil coolers for small hydraulic systems on tractors and transmission or engine oil cooling on automotive applications. Also suitable for air line aftercooling and use with other fluids. Do not install these coolers in systems with high shock loading such as hydraulic cylinder circuits.

- Pressure rating 11 bar
- Weight 2.1kg

HI-FLOW SERIES ALUMINIUM CORES - JIC PORTS - 14 BAR PART NO. 18/06183

- 14 bar Pressure rating
- Weight 4 kg

Ports A and B are Male JIC 37° flare UN type 1 1/16" 12TPI. C is 1/2" BSPP to ISO 228/1G. Flexible hose required.

HI-FLOW SERIES ALUMINIUM CORES

- Part No. 18/06304
- 20 bar Pressure rating
- Weight 75 kg

- Part No. 18/05928
- 30 bar Pressure rating
- Weight 27 kg

COOLING ELEMENTS

HI-FLOW SERIES ALUMINIUM CORES - 14 BAR

- 14 bar Pressure rating
- Very low pressure drop
- Suitable as air aftercooler

Ports BSPP to ISO 228/1G

* Heat capacity is at max oil flow, airflow of 5.1 m/s velocity through the core and oil/air inlet temp. difference of 30°C

◇ This port is on other side of the core to that shown.

Part No	New Equivalent	Cross reference	Old OEM (BSP)	Other (NPT)
1E4018	21/04778	66/01/00258	1E2922	1E2928
1E2924	21/04779	66/01/00259	-	1E2929
1E2926		66/01/00950	-	1E2931
1E2927		66/01/00951	-	1E2932
1E4041	18/05828	66/01/03712	3560 (Ext'd tank)	1E2966

Caution: Some original model coolers were supplied with NPT threaded ports. All new coolers have BSP threaded ports. BSP ports have a groove machined on the OD to assist in identifying the thread.

All dimensions in mm unless noted otherwise 0-50 are ± 1. 50-1500 are ± 3.
